

## Data Privacy and Security

Conventional access cards created a revolution in the world of security but, to date, remain vulnerable to loss and misuse. Now, advanced cards can store the biometrics of their owner. These new cards curb misuse in access control systems by verifying that the user matches the biometric data stored on the card.

Princeton Identity offers a simple process for encoding touchless biometrics onto a card. Cardholders never lose control of their biometrics, which travel securely with them on their cards. Biometric data are locked in the card and are therefore impervious to network attacks and vulnerabilities.

The Access200 provides a simple replacement for existing card readers and can be deployed at any site without needing to network each location.

## Features of Access200 Biometrics on Card:

- Identifies users with Two-Factor Authentication using card and biometrics
- Stores biometrics on a card with full encryption
- Never transmits biometrics across a network
- Enrolls subjects directly at the reader
- Enroll and identify without contact
- Uses industry leading Iris biometric matching
- Integrates with external elevated temperature detection
- Operates with or without a network connection

# Specifications

|                                       |   |
|---------------------------------------|---|
| Compatible PACS for automated syncing | Atrium Campus<br>Brivo Access<br>Feenics Keep<br>Genetec Security Center<br>Galaxy System Galaxy<br>Honeywell Pro-Watch<br>ICT Protégé GX<br>LenelS2 Netbox<br>LenelS2 OnGuard<br>RS2 Technologies Access It!<br>Software House C-Cure 9000 |
| Supported PACS connection type        | Wiegand<br>OSDP   |
| Card storage requirements             | 6KB   |
| Biometrics Stored                     | Iris  |
| Support for Card Writing              | Yes (no external card writer required)  |

Princeton Identity is the identity management company powered by biometrics, making security more convenient, accurate, and reliable than ever before. Using iris recognition and other technology, Princeton Identity enables businesses, global organizations, and borders to simplify identity management, resulting in improved safety and protection. Formerly a division within SRI International, Princeton Identity spun out as an independent venture in August 2016.
