

## IDS Series

Scalable software platform for identity management through an intuitive, easy-to-use web interface and an open, secure REST API. The platform provides a set of core services that includes multimodal and multifactor biometric identification, including iris and PINs.

The IDS Series manages PI's access and enrollment readers that include the IOM Access200 and Access200e.

## *Technology that Powers Freedom*

- Easily configure and manage your devices from an intuitive web browser interface
- Industry leading biometric technology, using fast and accurate iris recognition
- Live monitoring of enrollments or biometric collection points
- Scalable for managing single site to enterprise solutions
- Out of box integrations with the leading EAC systems
- Powerful API for easy integration with existing systems or custom applications
- End-to-end security: strong encryption for all communication and data
- User defined subject categories and alerts
