

## Solution Highlights

**EyeAllow™** and the all-weather **Access 200w™** deliver the ultimate identity assurance performance thanks to exclusive **Iris on the Move™** technology! Our solutions safeguard critical operations and infrastructure at top organizations around the world because they achieve...

### HIGHEST **SECURITY**

**FAST**, TOLERANT, AND BIAS-FREE AUTHENTICATION

**CONVENIENT** USE WITH PPE & FACE COVERINGS

**SCALABLE** USER POPULATION & MULTI-SITE OPERATION

INDOOR / **OUTDOOR**, ALL-WEATHER PERFORMANCE

CONFIGURABLE **SIX-MODALITY MFA**

EASY ONBOARDING & ADOPTION VIA **SEAMLESS ENROLLMENT**

LIGHTWEIGHT ADMINISTRATION & **LOW TCO**

INFOSEC, PII, AND DATA **PRIVACY ASSURED**

With the intrinsic advantages of iris recognition (accuracy and scalability), the powerful benefits enabled by Iris on the Move (super-fast identification and user motion / position tolerance), and the market-leading configurability of our ecosystem (reading 6 different credentials – iris, face, card, mobile, PIN, QR – with customizable workflows by subject and by device), Princeton Identity delivers unprecedented security and convenience, but also requires minimal operational overhead, works in various environmental conditions including low-light / wet / extreme heat or cold, and integrates seamlessly with your existing infrastructure.

We are proud to be the sole American company selling iris recognition with U.S. designed / manufactured hardware and U.S. written software / algorithms.

Reach out for a demonstration to see how Princeton Identity can help your organization harden security and save money.
